

Merry Mayhem's Case #120

PART 2:

Note: Drawings are NOT to scale!

Draw an "X" on the wrong side of each of your 5 3/4" LIGHT squares as shown at right.

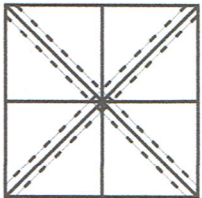

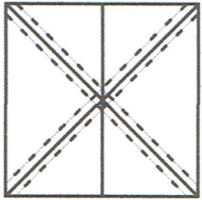

Combining them at random and using an accurate 1/4" seam on both sides of each diagonal line, sew sets of Light and Dark 5 3/4" squares right sides together so they look like the diagram at left.

(Please note that the squares in the diagram are shown slightly offset so you can see both layers; when actually layering the squares, you will stack them so their raw edges are even all the way around them.)

Next, carefully cut the above units apart in the following manner:

1. Cut exactly 2 7/8" in from one side of the square as shown in the first diagram at right.
2. Then cut exactly 2 7/8" across the square as shown in the second diagram.
3. Finally, cut **ON** each of the diagonal lines you drew. You should now have a total of EIGHT Half-Square Triangle units from each pair of 5 3/4" squares.

Press seam allowances toward your dark fabrics.

Depending upon which size project you are making, you should now have a total of 192 Half-Square Triangle units for the Crib size, (384) for the Lap, [640] for the Twin, OR {1344} for the Super-Queen, in sets of 8; each unit should measure 2 1/2" square from raw edge to raw edge.
