

Low Road - December

#####

Cutting Instructions

Background Fabric

32 - 5" squares cut in half diagonally (a bit oversized)

16 - 1 3/4" squares (center of block)

Dark, Medium and Light Fabrics

1 1/4" random strips totalling approximately 800 inches (you can get approximately 300 inches of 1 1/4" strips from a fat quarter and the same from a quarter meter)

#####

Log Cabin On Point Piecing Instructions

Starting with the 1 3/4" background square, make a traditional log cabin block. The log cabin block will measure 6 1/4" (raw).

Sew a background triangle on opposite corners of the log cabin block. And then sew a background triangle on the other 2 opposite corners of the log cabin block (see diagram on the next page).

Trim up the block to 8 1/2". You will need 16 of these.

Here are a few links on making a log cabin block. Please use the measurements that are provided at the top of this page and not the measurements given in these tutorials.
